The gray bars showing self-employment contain only work he identified as self-employment or unpaid volunteering. Some items in the white bar might actually be self-employment via JY Knows It, though. I displayed that information separately because TrustedNerd and JY Knows It have no stop dates and cluttered up the start/stop array of his other gigs.

Yaniv got his Kwantlen diploma in 2008, probably in May or June. Some of the jobs we know of but that are missing from his rez and LinkedIn profile may fit in the long employment gap that precedes the short-lived Telus job in 2010 - Costco, lifeguard, knife sales.

The jobs we know of but that are missing from his resume and LinkedIn profile are listed in a separate file. I wasn't able to peg dates specific enough to add any of them to the chart.
